GRADES 2-4 - COUNTING UP

Make change by counting up

Begin at the price, make friendly jumps, and stop at the amount paid. The jumps are the change.

Example: price $1.37 - paid $2.00

$1.37 to $1.40	$1.40 to $1.50	$1.50 to $2.00
+ $0.03	+ $0.10	+ $0.50

Change = $0.63

1. **Start at the price.**
2. **Jump to a friendly amount.**
3. **Continue to the amount paid.**
4. **Add the jumps and check by addition.**

GUIDED PRACTICE

Draw the count-up ladder

Show each jump, total the change, and check that price plus change equals amount paid.

PROBLEM 1 **Price $0.64** **Paid $1.00**

My jumps: _____

_____

_____

Change: _____ Check: _____

PROBLEM 2 **Price $1.28** **Paid $2.00**

My jumps: _____

_____

_____

Change: _____ Check: _____

PROBLEM 3 **Price $2.45** **Paid $5.00**

My jumps: _____

_____

_____

Change: _____ Check: _____

MINI COIN STORE

Shop, pay, and make change

Cut nothing out: choose an item, decide an amount paid, and use real or play coins to model the change.

Bright pencil

$0.45

Amount paid: _____

Sticker sheet

$0.75

Amount paid: _____

Tiny notebook

$1.20

Amount paid: _____

Puzzle card

$1.65

Amount paid: _____

My store story

I chose: _____

I paid: _____

The change was: _____

My count-up jumps were: _____
